# Optional Radiant Heating System Under Ceramic Floor

## Nuheat Installation

### Basic Guidelines for Tile and Stone Applications

Nuheat is the easiest floor warming system to install. Hassle-free, it does not require complicated calculations and there are no loose wires to worry about. The installation is a simple three-step process.

- For laminate, engineered wood and in-depth installation guidelines follow link: <http://www.nuheat.com/support/installation.cfm>

#### Step 1

**Thinset** – Trowel thinset

#### Step 2

**Nuheat** – Roll out the Nuheat mat

#### Step 3

**Tile** – Lay tile
